EastCONN Youth Employment Program

This summer Mansfield's recycling coordinator worked with the EastCONN Youth Employment Program to help screen out plastics from the school's finished compost. The screened compost is now ready to be used this school year at all four schools. The compost was made by combining lunchtime food scraps with leaves, wood chips and wood shavings during the school year. The finished compost looks like dark soil and is packed with nutrients and beneficial microbes that help plants thrive and supports healthy soil. In previous years, the compost has been used in the schools' greenhouses, and in the case of Southeast and Middle schools, their garden projects. School composting began at Southeast Elementary School in 1997 and expanded to the Goodwin, Vinton and the Middle Schools over the next two years. Each year the four schools compost a total of about 26,000 pounds of food scraps, which produces roughly 10 cubic yards of finished, nutrient-rich compost. In total the schools have composted 221 tons or 442,000 pounds of food scraps.

The picture was taken by the screened compost at Vinton Elementary School. The youth employment interns who did the screening are (from left to right): Kinen, Jacob, Grace, Waldemar, Mathew, Gordan, Jesse, Randi, Cole, Alan and Stephen, along with Mansfield Recycling Coordinator, Virginia Walton, and EastCONN internship leader, Ian.
